

Prof. Dr. Jonas Dovern  
Chair of Statistics and Econometrics  
Lange Gasse 20  
90403 Nürnberg

The chair of Statistics and Econometrics at the School of Business, Economics and Society at Friedrich-Alexander-Universität Erlangen-Nürnberg invites applications for a position as

**Postdoc in Empirical Macroeconomics or Time-Series Econometrics  
(Wissenschaftliche(r) Mitarbeiter\*in, salary scale TVL E13, 100 %)**

starting on February 1, 2024. The position is initially for three years with a possible extension for another three years. There is also the option to convert the position to a temporary civil servant position (A13).

Our team's research focuses on issues related to macroeconomic expectations (in particular analyses using survey data) and time-series econometrics (mostly related to macroeconomic forecasting, including applications of machine learning methods). While experience in one of these fields is considered a beneficial qualification, we welcome applications from related fields.

We offer the opportunity to join a young and research-focused team that provides sufficient funding for attending conferences or visiting coauthors. Our department has close contacts to other institutions such as the IAB in Nuremberg or the ifo Institute in Munich, which provide valuable data access. Candidates will have the opportunity to pursue their own research agenda and to develop their own Bachelor or Master courses.

Candidates must have a completed dissertation in empirical macroeconomics, econometrics, or statistics. (We will not consider applications from candidates with unsubmitted theses and scheduled defense dates after December 2023.) Candidates should have a strong publication record or potential to publish in international, peer-reviewed journals. They should have excellent English and German skills (due to teaching obligations). Teaching experience in the area of statistics or econometrics is beneficial.

The position is full time (100%) and comes with the standard teaching load of 5 hours per week (for approximately 30 weeks per year). The working and teaching place is Nuremberg, with some possibility for remote work on non-teaching days.

Please apply until 30. September 2023 with a short letter of motivation (max 1 page), a CV including a publication list, and, if applicable, material to demonstrate skills or experiences (e.g., papers, PhD thesis, etc.). Please either include two letters of recommendation or provide reference contact details (email and/or phone). Applications should be sent as one PDF document to [wiso-oekonometrie@fau.de](mailto:wiso-oekonometrie@fau.de).

Friedrich-Alexander-Universität Erlangen-Nürnberg is an equal opportunity employer and qualified women are specifically invited to apply. Family-friendly policies are an essential part of the profile of our university. Preference will be given to equally qualified applicants with disabilities.
